

THE SUPER SHOT HOSE AND WAND HAS BEEN IMPROVED.

The new style hoses and wands will be supplied standard with all units starting in July. The new hose and wand in combination has an increased I.D. of 3/4" on both the hose and the wand. By using the new higher flow hose and wand combination you will increase sealant output by 30% or more. Additionally the wand end will now allow for any 3/4" thread Crafcro sealing tip to screw directly into the wand without an adapter. The new 51756 duck bill adapter, which is removable will be supplied with all new melters and new replacement wands.

REPLACEMENT HOSES & WANDS

New (3/4"ID) Super Shot Hoses and Wands will directly replace the current (1/2"ID) style and provide the increased output of existing units when both the hose and the wand are replaced. Although it is not required, we recommend when replacing a hose, the wand be upgraded to the (3/4"ID) hose on all existing units.

The 1/2"ID Super Shot hoses will still be available to be used when using the old 51055 (1/2"ID) wand although the part numbers have changed.

The 51055 (1/2"ID) wand will no longer be available. Customers replacing this wand will receive a New (3/4"ID) wand with a removable bushing to adapt to the 1/2"ID hose.

New SuperShot wand end. Use any Crafcro sealing tip or the supplied duck bill

Duck bill adapter. #51756

Wand end assembly, #51730 with duck bill adapter.

Assembly with duck bill.

Wand hose connector with the supplied bushing. If you purchase the new high flow wand the bushing will connect to the old hose.

The new SuperShot wand/hose 3/4" connector. This is for the high flow hose.

High flow hose and assembly. #51730 – wand #51775 – hose

NEW HOSE PART NUMBERS

- 51745** **10' 12V HEATED HOSE W/ 1/2" ends** (replaces 50570)
Used with 51055 1/2"ID wand
- 51742** **15' 12V HEATED HOSE W/ 1/2" ends** (replaces 51700)
Used with 51055 1/2"ID wand
- 51744** **18' 12V HEATED HOSE W/ 1/2" ends** (replaces 51720)
Used with 51055 1/2"ID wand
- 51779** ***HIGH OUTPUT 10' 12V HEATED HOSE W/ 3/4"both ends*** (replaces 50570)
CAN ONLY BE USED WITH 51730 HIGH OUTPUT WAND
- 51775** ***HIGH OUTPUT 15' 12V HEATED HOSE, 3/4" both ends*** (replaces 51700)
CAN ONLY BE USED WITH 51730 HIGH OUTPUT WAND
- 51776** ***HIGH OUTPUT 18' 12V HEATED HOSE W/ 3/4" both ends*** (replaces 51720)
CAN ONLY BE USED WITH 51730 HIGH OUTPUT WAND
- 51730** **48" WAND, 3/4"ID** for use with 3/4" ID hoses 51775, 51776, and 51779
- 51743** **48" WAND, 12V, 1/2"** (replaces 51055)
For use with 1/2"ID hoses 51700, 51720, 50570, 51742, 51744, and 51745
Note: This is a 51730 with a reducer bushing (28348)to fit the smaller hoses.
