

READ BEFORE USING THIS PRODUCT

GENERAL Crafcro RoadSaver Silicone is a uniquely formulated low modulus non-sag silicone for sealing joints in portland cement concrete pavements in all climates. The product is supplied as a ready-to-use one component moisture curing system which provides a lasting and flexible seal. Crafcro RoadSaver Silicone can be used in all typical concrete joint applications on highway and airfield pavements. Crafcro RoadSaver Silicone offers outstanding weathering resistance, remains flexible down to temperatures as low as -50°F (-46°C), is jet-blast resistant and will maintain field serviceability when exposed to intermittent fuel and oil spills. The sealant bonds strongly to portland cement concrete joints without the use of a primer. RoadSaver Silicone sealant is compatible with asphalt pavement. RoadSaver Silicone is easily applied to pavement joints using bulk dispensing system units such as the Roadstar joint sealant pump or those available from manufacturers including Pyles/Graco and Johnstone. RoadSaver Silicone has been a top performing quality Crafcro product for over 15 years, and has achieved the Crafcro **CERTIFIED PERFORMANCE** designation. VOC < 75 g/l.

USAGE GUIDELINES RoadSaver Silicone pavement temperature performance limits are 82-46 for joint sealing. Usage recommendations are shown in Crafcro pavement temperature grade charts shown at the right. Refer to Crafcro Product Selection Procedures to determine sealant or filler and pavement temperature grades.
